1. Simple instructions

Using Terminal Here is as easy as opening it.

The next time you open Terminal Here, a terminal prompt will open, cd'ed to the directory you are currently on in Finder.

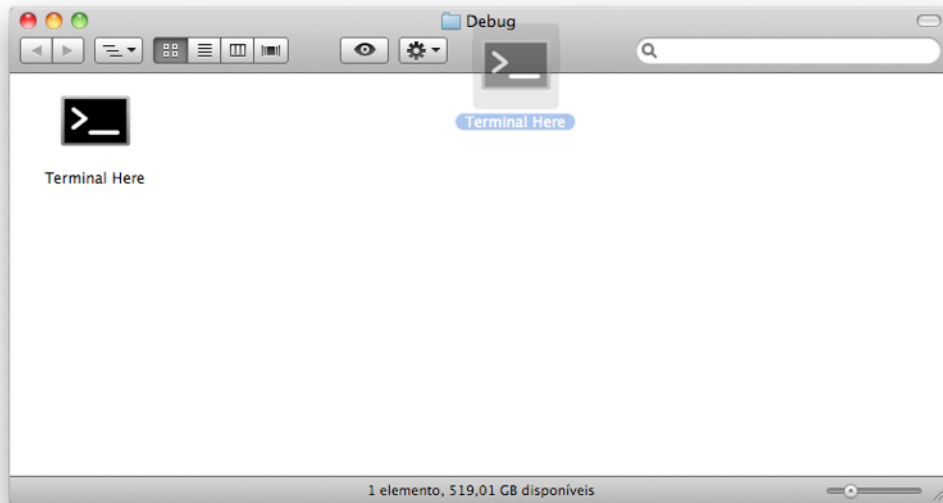

2. Making it more useful...

Let's think. Who wants to have to open an application just to open a terminal prompt cd'ed to the Finder location?

We think the same too.

Because of that, we made it so you could add a Terminal Here icon to your Finder window.

Just drag it like this...

And your Finder window will look like that:
